Functionality Testing Report

Project Name: Zafenity

URL: https://zafenity.com/

Bug ID: #001

Bug Title: User Account Registration & Verification Issue.

Severity: High

Priority: High

Bug Description: Whenever we try to create and verify an account with a variation of email within the same browser, the provided verification link through email redirects the error HTTP code 500.

Steps to Reproduce:

1. Go to the URL: https://zafenity.com/
2. Click on the Registration icon from the top right of this application.
3. Input Email & Password fields as well as Confirm Password.
4. Go to the Email Inbox & click on the verification link.
5. Observe.

Expected Result: The Account must be verified by clicking the verification link.

Actual Result: The Account could not be verified by clicking the verification link. It redirects to HTTP error 500.

Bug ID: #002
Bug Title: Profile Picture Update Related Issue.

Severity: High
Priority: High

Bug Description:

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick a User Role and Click on the User Account icon, then select the "*My Profile*" Option from the Top right of this application.
4. Click on Choose File Option to Upload an image.
5. Observe.

Expected Result: By picking an image to update Profile Picture, it will show the review to update the change by a single image. Then after clicking on the update button, the review criteria will be updated.

Actual Result: By picking an image to update Profile Picture, it shows the review to update the change by double image. The previous profile image is also shown here. Then after clicking on the update button, the profile picture also has a loading delay to show on the top-right account icon.

Bug ID: # 003

Bug Title: Role Picking Related Issue.

Severity: Low
Priority: Low

Bug Description:

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick a User Role that you have already registered.
4. Observe.

Expected Result: Choosing a User Role already registered by a User will directly redirect to the Selected User Role Dashboard.

Actual Result: Whenever picking a pre-registered role, the application again shows the role on the registration page and then automatically redirects to the User Role Dashboard.

Bug ID: # 004

Bug Title: Phone Number Validation issues in the user profile.

Severity: High
Priority: High

Bug Description: Whenever we try to update or insert a mobile number in the desired field, it takes garbage value input such as alphanumeric values.

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick a User Role that you have already registered.
4. Click on the Account icon from the top right and select my profile option.
5. Input an alphanumeric value in the Phone number field.
6. Click on the update button.
7. Observe.

Expected Result: Without valid input of this field, we cannot update our profile. If an invalid data input is here, it must give a toast message as a response that inserts a valid number.

Actual Result: The Phone number field is not validated and takes an update with a garbage value. Also, no toast message is implemented here for correction.

Bug ID: #005
Bug Title: User Dashboard-related issue.

Severity: High
Priority: High

Bug Description: After Registering a role, the application shows the Registration form of the role again and then redirects to the dashboard.

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick a User Role that you have already registered.
4. Observe.

Expected Result: The user can directly redirect to their dashboard after registering a role.

Actual Result: After registering a role user can not directly redirect to their dashboard. The registration form appears again and then redirects to the user dashboard.

Bug ID: #006
Bug Title: Real Estate Agent Registration Form Validation Issue.

Severity: High
Priority: High

Bug Description: The role registers whenever we register as a Real Estate agent, giving input in the Name Field Alphanumeric and input garbage value in Experience & Pocket Card No.

Steps to Reproduce:

1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick the Real Estate Agent Role for registration.
4. Observe.

Expected Result: The user cannot register by using garbage input.

Actual Result: The user can register by using garbage input.

Evidence: Real-Estate-Agent-Registration-Issue.mp4 (*Click here to see Video*)

Bug ID: #007

Bug Title: Home Inspector Registration Form Validation Issue.

Severity: High
Priority: High

Bug Description: Whenever we register as Home Inspector Role, giving input in the Name Field Alphanumeric and input garbage value in Experience & Pocket Card No, the role registers.

Steps to Reproduce:

1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick the Real Home Inspector Role for registration.
4. Observe.

Expected Result: The user cannot register by using garbage input.

Actual Result: The user can register by using garbage input.

Evidence: [Home-Inspector-Registration-Issue.mp4](#) (*Click here to see Video*)

Bug ID: #008
Bug Title: Attorney Registration Role's Form Validation Issue.

Severity: High
Priority: High

Bug Description: Whenever we register as Attorney Role, giving input in the Name Field Alphanumeric and input garbage value in Experience & Pocket Card No, the role registers.

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick Attorney Role for registration.
4. Observe.

Expected Result: The user cannot register by using garbage input.

Actual Result: The user can register by using garbage input.

Evidence: [Attorny-Registration-Issue(Form-Validation).mp4](#) (*Click here to see Video*)

Bug ID: #009

Bug Title: Agent Assign Related Issue

Severity: Low
Priority: High

Bug Description: Whenever we assign an Agent to buy land property, after selecting an agent, the selection popup message occurs "Assigned Agent Already."

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick the Land Owner Role.
4. Go to the Create New Job option.
5. Provide Project information.
6. Then go to Created Project option.
7. Click on a pending project to assign an agent.
8. Find the Agent via State & ZIP code.
9. Select an Agent to assign.
10.   Observe.

Expected Result: Only one success message will appear after selecting an agent.

Actual Result: After selecting an agent success message, a Popup says "Assigned Agent Already."

Evidence: Assigned-Agent-Already-issue.mp4 (*Click here to see Video*)

Bug ID: #010

Bug Title: Home Insurance Registration Form Validation Issue.

Severity: High

Priority: High

Bug Description: Whenever we register for Home Insurance, give input in the Name field Alphanumeric and input garbage value in Experience & Pocket Card No, the role registers.

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick Home Insurance for registration.
4. Observe.

Expected Result: The user cannot register by using garbage input.

Actual Result: The user can register by using garbage input.

Evidence: Home-Insurance-Registration.mp4 (*Click here to see Video*)

Bug ID: #011

Bug Title: Contractor Registration Form Validation Issue.

Severity: High

Priority: High

Bug Description: Whenever we register as Contractor Role, giving input in the Name Field Alphanumeric and input garbage value in Experience & Pocket Card No, the role registers.

Steps to Reproduce:

1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick the Contractor Role for registration.
4. Observe.

Expected Result: The user cannot register by using garbage input.

Actual Result: The user can register by using garbage input.

Evidence: Contractor-Registration-issue.mp4 (*Click here to see Video*)

Bug ID: #012
Bug Title: Home Buyer Registration Form Validation Issue.

Severity: High
Priority: High

Bug Description: Whenever we register for Home Buyer, give input in the Name Field Alphanumeric and input garbage value in Phone Number the role registers.

Steps to Reproduce:

1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick the Home Buyer for registration.
4. Observe.

Expected Result: The user cannot register by using garbage input.

Actual Result: The user can register by using garbage input.

Evidence: [Home-Buyer-Form-Validation.mp4](#) **(***Click here to see Video***)**

Bug ID: #013

Bug Title: Mortgage Banker Registration Form Validation Issue.

Severity: High
Priority: High

Bug Description: Whenever we register as Mortgage Banker Role, give input in the Name Field Alphanumeric and input garbage value in Experience & Pocket Card No, the role registers.

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick the Mortgage Banker Role for registration.
4. Observe.

Expected Result: The user cannot register by using garbage input.

Actual Result: The user can register by using garbage input.

Evidence: [Mortgage-Banker-Registration-Issue.mp4](#) **(***Click here to see Video***)**

Bug ID: #014

Bug Title: Create Ad-Related Issue

Severity: High
Priority: High

Bug Description: Whenever we create an Ad, the Quote Description field has a limit for the text but is not implemented here for hints like Headline Field has.

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/
2. Login with User Credentials.
3. Pick Real Estate Agent Role and go to the dashboard.
4. Create an Ad from Create Ad option.
5. Go to my Ad List option.
6. Edit a Pending Ad.
7. Input a long string in the Quote and the Description field.
8. Observe.

Expected Result: If the text field limit exceeds the input field should not take any input. It also gives a toast message or hints about limitations.

Actual Result: After the limit exceeds, the fields are taking input, and no hints or toast message for that.

Evidence: Ad-Related-Issue.mp4 (*Click here to see Video*)

Bug ID: #015

Bug Title: Vendor Registration Form Validation Issue.

Severity: High

Priority: High

Bug Description: Whenever we register for Vendor, give input in the Name Field Alphanumeric and input garbage value in Phone Number the role registers.

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/
2. Login With User Credentials.
3. Pick Vendor role for registration.
4. Observe.

Expected Result: The user cannot register by using garbage input.

Actual Result: The user can register by using garbage input.

Evidence: Vendor-Registration-Form-Validation.mp4 (*Click here to see Video*)

Bug ID: #016
Bug Title: Web content Loading issue in Find Agents Module.

Severity: Low

Priority: High

Bug Description: The web content has a loading issue with status code 400.

Steps to Reproduce:
1. Go to the URL: https://zafenity.com/find-agents
2. Scroll down on Promotional Advertisement.

3. Observe.

Expected Result: The web Content should render appropriately for the end user's visibility.

Actual Result: The web Content could not render appropriately in this section.

Evidence: [Promotional-Advertisement-Issue.mp4](#) **(***Click here to see Video*)**

Bug ID: #017

Bug Title: Web content Loading issue in Find Services Module.

Severity: Low

Priority: High

Bug Description: The web content has a loading issue with a Network error.

Steps to Reproduce:
4. Go to the URL: https://zafenity.com/find-services
5. Scroll down on the "Our Vendors Working Gracefully Around You. See How We Work" section.
6. Observe.

Expected Result: The web Content should render appropriately for the end user's visibility.

Actual Result: The web Content could not render appropriately in this section.

Evidence: [See-Vendor's-Work-Issue.mp4](#) **(***Click here to see Video*)**
